

**Tokina**
opera50
F1.4 FF

FILTER SIZE: 72mm

ENGLISH**How to attach and remove lens**

Please follow the camera instruction manual for attaching and removing.

If the lens does not touch or is electrically connected on the mounting face of the lens while attaching or removing.

Focusing■**Focusing via AF/Auto-Focus**

The lens has a built-in motor system to achieve high-speed and quiet Auto-Focus. It is equipped with a full-time manual function enabled by turning the focus ring with the lens.

■**How to use the focus ring**

1) Set the AF/M mode switch on the side of the lens to "AF".

2) Turn the focus ring clockwise to operate the auto-focus.

3) Turn the focus ring, light up the AF button.

4) Press the shutter button to shoot.

■**Focusing via MF Manual Focus**

Adjust the focus by rotating the focus ring.

■**How to use the focus ring**

1) Set the AF/M mode switch on the side of the lens to "MF".

2) Rotate the focus ring while checking the focus or monitor.

■**Exposure Mode**

Please follow the camera instruction manual to set the exposure mode.

■**Nikon Mount Specifications**

This lens uses an electromagnetic aperture. If the same specifications are required for other cameras, please refer to the camera's instruction manual.

Please check the website for supported models.

Filter

Please use round screw-in filters. If there is oil or water drops on the filter, it will cause lens flare and ghosting. Please be sure to clean the filter.

■**Mount Specifications**

This lens uses an electromagnetic aperture. If the same specifications are required for other cameras, please refer to the camera's instruction manual.

Please check the website for supported models.

Antistatic

Please use round screw-in filters. If there is oil or water drops on the filter, it will cause lens flare and ghosting. Please be sure to clean the filter.

■**How to use the lens**

1) Please follow the camera instruction manual to set the exposure mode.

2) Turn the focus ring clockwise to operate the auto-focus.

3) Turn the focus ring, light up the AF button.

4) Press the shutter button to shoot.

■**How to use the lens**

1) Please follow the camera instruction manual to set the exposure mode.

2) Rotate the focus ring while checking the focus or monitor.

Lens hood

The hood prevents strong angular light diagonally from the front and from the side directly entering the lens and causing lens flare or ghosting. Please use the lens hood when shooting in bright indoor scenes where bright light is present as well as to protect the lens.

How to attach the lens hood

1) Turn the lens to the left so the hood attachment mark (I) with the markings "AF" and "MF" is facing the right pointing away from the front.

2) Turn the lens to the right so the hood can be attached with either side facing the front. Please make sure that it is lined up with the lens hood markings.

3) The hood can be attached by hand to the rear of the lens.

■**General Polarity Filter Window**

The hood allows a circular polarizing filter to be operated while the window is open.

How to use

Slide the lower part (BH-72C) of the hood into the lens. Turn the hood clockwise to remove the BH-72C part. The circular polarizing filter can be operated through the window. Please turn the hood counter-clockwise to avoid losing it while using the operation window.

■**Notes for using a bulb-in-lens**

When shooting in the camera body, turn the bulb-in-lens function off. Please turn the bulb-in-lens function on if the light causes a noticeable shadow in the picture. In such cases please use an external flash.

Shutter Release■**How to use the AF/Auto-Focus**

If photographing people and the subjects are red, please consult the camera's instruction manual for ways to remove red eye effect.

Rotation direction of the focus ring

The rotation direction of the focus ring is the same as the official Nikon and Canon lenses, respectively.

Dust and Moisture Prevention

This lens is designed to avoid dust and moisture.

■**How to use the lens**

Please follow the camera instruction manual for ways to prevent dust and moisture.

Basic Care and Storage■**How to use the lens**

Please follow the camera instruction manual for ways to prevent dust and moisture.

How to clean and store the lens

1) Turn the lens to the left so the hood attachment mark (I) with the markings "AF" and "MF" is facing the right pointing away from the front.

2) Turn the lens to the right so the hood can be attached with either side facing the front.

3) The hood can be attached by hand to the rear of the lens.

■**How to use the lens**

1) Please follow the camera instruction manual for ways to prevent dust and moisture.

How to use the lens

1) Set the AF/M mode switch on the side of the lens to "AF".

2) Turn the focus ring clockwise to operate the auto-focus.

3) Turn the focus ring, light up the AF button.

4) Press the shutter button to shoot.

How to use the lens

1) Please follow the camera instruction manual for ways to prevent dust and moisture.

How to use the lens

1) Set the AF/M mode switch on the side of the lens to "MF".

2) Rotate the focus ring while checking the focus or monitor.

Exposure Mode

Please follow the camera instruction manual to set the exposure mode.
